

item number:

DZTP 200_ZM
INOXDZTP 200_IX

product description:

The forming strip is used as auxiliary component to reinforce joints when forming wire cable trays.
The strip can be used in its flat form (e.g., to reinforce the bottom) or bent to the required angle when creating bends and branches.
The strip can be fixed to the wire cable tray at any place using the DZSU (INOXDZSU) bolt.

surface finish:

ZM - Magnelis® - galvanized steel with admixture of magnesium and aluminum according to EN 10346, EN 10143, protective layer 18-31 µm

IX - Stainless steel AISI 304

meets the requirements: ČSN EN 61537:02

storage:

ČSN EN 60721-3-1

**WARNING****Risk of injury from cutting**

Although the cable trays are produced with maximum effort to minimize sharper edges, it is necessary to wear protective gloves to carry, grip and work with cable elements.

Electricity injury

As individual components of cable management systems are made of electrical conductive material, it is essential not to work with a system near live electrical parts. Infringement of the safety regulations may cause serious injury of health or death.

Safe Use

Under normal and foreseeable conditions of use, there are no risks to consumers, provided that proper installation and usage are carried out in accordance with the installation manual.
